

Program	Post Graduate Diploma in Data Science
Semester	1
Subject Code and Name	1628008 Business Analytics
Credit	5

Objectives

- To develop domain knowledge of various technology and its application to facilitates managerial decision /MIS.
- To understand the significance of global platform for data retrieval/process among different business cultures of the world.
- To provide knowledge of forecasting techniques after analysis of business data.

Unit No.	Topic(s)	No. of Hours
1.	Overview of Business analytics Scope of Business analytics, Business Analytics Process, Relationship of Business Analytics Process and organization, competitive advantages of Business Analytics Statistical Tools, Statistical Notation, Descriptive Statistical methods, Review of probability, distribution and data modeling, sampling and estimation methods overview	8
2.	Trendiness and Regression Analysis Modeling Relationships and Trends in Data, simple Linear Regression. Important Resources, Business Analytics Personnel, Data and models for Business analytics, problem solving, Visualizing and Exploring Data, Business Analytics Technology	8
3.	Organization Structures of Business analytics Team management, Management Issues, Designing Information Policy, Outsourcing, Ensuring Data Quality, Measuring contribution of Business analytics, Managing Changes. Descriptive Analytics, predictive analytics, predicative modeling, Predictive analytics analysis, Data Mining, Data Mining Methodologies, Prescriptive analytics and its step in the business analytics Process, Prescriptive modeling, nonlinear Optimization	6
4.	Forecasting Techniques Qualitative and Judgmental Forecasting, Statistical Forecasting Models, Forecasting Models for Stationary Time Series, Forecasting Models for Time Series with a Linear Trend, Forecasting Time Series with Seasonality, Regression Forecasting with Casual Variables, Selecting Appropriate Forecasting Models. Monte Carlo Simulation and Risk Analysis: Monte Carle Simulation Using Analytic Solver Platform, New-Product Development Model, Newsvendor Model, Overbooking Model, Cash Budget Model	8
5.	Decision Analysis Formulating Decision Problems, Decision Strategies with the without Outcome Probabilities, Decision Trees, The Value of Information, Utility and Decision Making	6
6.	Recent Trends Embedded and collaborative business intelligence, Visual data recovery, Data Storytelling and Data journalism	4
