

# Webinar 11: Research and Development in 5G and IOT Network by using NetSim tool

**Date:** 31<sup>st</sup> October 2020

**Time:** 1:30 PM to 2:30 PM

**Speaker:** Mr. Kanagaraj Krishnamoorthy, Application Engineer, TETCOS LLP

Agenda: Introduction to NetSim IoT in NetSim 5G in NetSim R&D Projects using NetSim Q&A

## About the Webinar:

Graduate School of Engineering and Technology-GTU has organized a webinar on “Research and Development in 5G and IOT Network by using Netsim” in collaboration with TETCOS LLP. This webinar will provide an opportunity to learn fundamentals of Netsim, Application of Netsim in 5G network and IOT network. Expert has done demonstration of R & D project by using Netsim. To ensure a comprehensive learning experience the workshops are focused on providing a hands-on learning experience of several tools.

## Objective of the particular webinar

This webinar was focused on the NetSim tool. NetSim is software simulation tool for different advance network. This software is useful for practical purpose for network related subjects. It is also useful for research in networking area like 5G network, IoT network etc.

Main objective of this webinar was to make aware with NetSim software to the students and faculties of various technical institutes. Students and faculties were able to implement Netsim for practical and R & D purpose the field of networking.

**During the session around the 50 Participants were joined from differ institutes**

## Glimpse of Webinar:
