

Expert Session: Wireless Sensor Nodes and IoT Product Design Cycle

Date: 6th July, 2021

Time: 3:30 PM to 04:30 PM

About Expert Session:

GTU-Graduate School of Engineering and Technology had organized the Online expert session on “**Wireless Sensor Nodes and IoT Product Design Cycle**” on 6th July, 2021. Mr. Manish Joshi General Manager, Scientech Technologies Pvt. Ltd. Indore has delivered the expert session.

- Mr. Joshi talked about Product design Cycle of IoT product. He explained importance of wireless sensor nodes in the architecture of IoT.
- He has also discussed sensors, wireless protocols, controller and power management in WSN and IoT. He has covered Artificial Intelligence with machine learning and deep learning and Industry 4.0.

Prof. S.K. Hadia, Associate Professor, GTU-GSET had welcomed and introduced expert and end proposed with vote of thanks at the end of session. The overall coordination of this webinar was done by Prof. S K Hadia, Associate Professor, GTU-GSET.

During The session around 16 participants of GSET had joined in the expert session.

OUTCOME:

After attending session participant are able to understand design of IoT. They learnt different terminologies of wireless sensor network and IoT.
