- Case study of copyright filing process

The Abstract of the Webinar:

There is an ongoing pursuit to aware and encourage students and faculty about protect Intellectual Property Rights (IPR), because it significantly contributes to countries' national economies. Industries as well as innovators across countries rely on the adequate enforcement of their patents, trademarks, and copyrights; to ensure safe and guaranteed products with continuously evolving technology gets delivered to customers. The protection of Intellectual Property Rights (IPR) is very important for the economy and to promote research and innovation. The webinar was arranged to aware the post graduate (GSET) as well as under graduate students (GPERI) about the IP protection laws and their importance. The objective is to provide guidance on submission of patent/copyright/trademark/design application to the Office of the Controller General of IPR operating under the Department of Industrial Policy and Promotion. In addition, how IP applications can be filed in other countries, was also briefly introduced along with discussion of case study of copyright obtained in Canada by the speaker.
