Report on “Visit to BISAG under BIS”

GTU-SET organized a visit to BISAG on 01/12/2025 under BIS, which aimed at providing students with practical exposure to broadcasting operations and satellite data management. Approximately 100 students participated in the visit, which was planned in two batches with timings at 11:00 AM and 1:00 PM, respectively. The students were divided into two batches for smooth coordination: Batch 1 was guided by Dr. Aanal Raval and Prof. Parth Chauhan, while Batch 2 was supervised by Prof. Ritisha Bhatt and Prof. Komal Prajapati. During the visit, students were provided with detailed insights into BISAG’s state-of-the-art facilities, including live broadcasting rooms, control systems, and the processes involved in handling, processing, and managing data received from satellites. They observed demonstrations of real-time broadcasting operations and data workflows, which helped them connect theoretical knowledge with practical applications. In addition, the visit offered opportunities for students to interact with BISAG professionals, ask questions, and clarify doubts about the technological and operational aspects of satellite data management and broadcasting. This hands-on exposure enhanced the students’ understanding of applied technologies in these domains and motivated them to explore career opportunities in related fields.

The visit proved to be highly informative and successfully achieved its objective of providing meaningful learning experiences. Students actively participated in discussions and demonstrations, which fostered engagement and deepened their comprehension of BISAG’s operations. Overall, the visit was meticulously organized, ensuring smooth coordination, timely execution, and an enriching experience for all participants. Detailed batch distribution was attached for reference.
