Report on Quantitative Aptitude Quiz
(B.E. Semester 7 – Placement Preparation Activity)

Date: 19/08/2026

Coordinated by: Dr. Anal Raval, Prof. G. D. Makwana, Prof. Dipak Dabhi

GTU-SET has initiated a series of Quantitative Aptitude quizzes as part of its placement preparation activities for B.E. Semester 7 students. The initiative is aimed at providing students with regular practice and strengthening their aptitude skills required for various campus placement examinations and recruitment processes.

As a part of this quiz series, a Quantitative Aptitude Quiz was conducted on Wednesday at 3:00 PM. The quiz covered four important topics: Number System, Percentages, Profit & Loss, and Ratio & Proportion. The activity encouraged students to participate actively and assess their understanding of fundamental quantitative aptitude concepts. Regular quizzes of this nature can help students identify areas requiring improvement and build confidence for placement examinations. The quiz series is a useful initiative by GTU SET to support students in their placement preparation and develop essential quantitative aptitude skills.

Approximately 60 students appeared for the quiz. Based on the recorded scores, the average performance was approximately 70%. The quiz was a useful component of the placement preparation initiative undertaken by GTU-SET. The continuation of such topic-wise quizzes will help students systematically improve their aptitude skills and prepare more effectively for recruitment and placement opportunities.
